## CLUSTER 1: *OPEN EDUCATIONAL RESOURCES FOR COLLABORATIVE LEARNING*
### GUIDELINES ON HOW TO CONDUCT COURSES

This section describes the activities you must complete to finish one or both courses and earn a certificate.

Both courses include analysis of theoretical readings, video watching, and the final self-assessment quizzes. After you conduct all tasks, you will be requested to deliver a final collaborative assignment, questions, and self-assessment quizzes.

At the end of each lesson, you can share your experience and ideas in a discussion forum. Please check the symbols below to help you follow the module's structure.

**Read** theoretical introductions, articles, and chapters

**Watch** video recordings where international experts introduce or share insights on a particular topic

**Explore** the infographics, tables and figures that provide more structured information on a given topic

**Reflect** on given questions to find ways how to improve your teaching and learning practice

**Self-assess** your learning and understanding of the topic

**Share and discuss** your ideas and experiences on a given question in a discussion forum

**Additional resources** are optional for you to analyse and study the topic more explicitly.

## SELF-ASSESSMENT AND FINAL QUIZZES

For consistent learning progress, each lesson ends with **a self-assessment quiz** that includes 7 multiple-choice. These quizzes are for self-assessment, and scores are not calculated. We recommend taking these quizzes since we might incorporate some of them into the final quiz.

The **final quiz** will help you to self-assess your learning and overall understanding of training content. The final quiz has 15 multiple-choice questions. You can take the quiz as many times as you need to.

To earn a **Certificate of Attendance**, you must score at least 12 out of 15 points (80% of total points).

To earn a **Certificate of Achievement**, you will need to complete a self-assessment quiz (score with at least 12 points, 80%, of total points) and deliver the final collaborative assignment (described below) in the form of an OER.

## FINAL COLLABORATIVE ASSIGNMENT

The final assignment in this cluster is *to create an OER in collaboration with other course participants*.

The assignment is to **create an OER in the scope of 1000 words.**

A more detailed task description is presented in a separate document "Description of a Final Collaborative Assignment" (below).

## CERTIFICATES

Two types of certificates can be issued at the end of the course:

| | |
|---|---|
| **Certificate of Attendance** | This certificate confirms that the student has *taken the course*, *studied the course material,* and *passed the final quiz* with a minimum score of 80%. |
| **Certificate of Achievement** | This certificate confirms that the student has *completed the final quiz* with a minimum score of 80% and *completed the final collaborative assignment*. |

*Let's study, collaborate, and share!*
